

# ImagePerfect™ 9500 EverGreen (FR)

**ImagePerfect™ 9500 EverGreen is a superior quality, PVC-free range with a permanent, water-based adhesive. This range is available in black and white (in both gloss and matt) together with 18 contemporary gloss colours.**

ImagePerfect™ 9500 EverGreen is suitable for a wide variety of indoor and medium-term outdoor applications on flat and slightly curved surfaces, such as general purpose signage, window graphics, durable outdoor advertising, vehicle graphics, public transport advertising, sign systems, etc. The specially-formulated, recyclable film is 100% PVC-free and 100% plasticiser-free and yet it has the softness, flexibility and characteristics of a plasticised, PVC film, including easy cutting and weeding properties. An advanced, permanent, water-based (100% solvent-free) adhesive creates a strong final bond to ensure a secure, stable and durable finish. The high-quality, 100% recycled liner is made from an FSC-certified base paper with a fossil-free LDPE coating that promotes excellent layflat. In comparison to release liners that are more typically utilised within the graphics industry, this special liner takes 60% less CO<sub>2</sub> to manufacture and so its production has significantly less environmental impact. As well as focussing on the environmental credibility of the raw materials - the film, adhesive and liner - the environmental philosophy also extends to all of the packaging elements for IP EverGreen. The core holders (end bungs/roll supports) are made from 100% recycled, FSC-certified cardboard and 100% recycled LDPE, thereby representing a more environmentally-responsible option when compared to the plastic core holders that are more typically used within the graphics industry. The cores themselves are made from 100% recycled cardboard (with the ImagePerfect identity being printed with water-based ink) that are then 100% recyclable and the bags are made from 100% biodegradable polyethylene. The box is made from natural cardboard with no chemical bleaching that is sourced from FSC-certified plantations and its unique design ensures strength and integrity without needing (plastic) closure tapes. The boxes are also printed with information that details the nature and disposal of each of the individual elements within the box. Additionally, IP EverGreen is produced at the Eikon factory in the UK, using only European-sourced raw materials in order to minimise the CO<sub>2</sub> footprint. For installation, we would recommend an application temperature of no less than 10°C.

Specifications	
Description	PVC-free signage film
Colour	Black and white (gloss and matt) and 18 colours (gloss)
Thickness	70mym
Weight	N/A
Adhesive	Advanced acrylic, permanent
Adhesive Strength	16N/25mm (Finat TM 1/24h)
Release Paper	100% recycled, FSC-certified base paper with a fossil-free LDPE coating, 140gsm siliconised
Temperature Range	-15°C to +60°C
Durability (unprinted)	5 years
Flame Retardancy	B-s1, d0
Shelf Life	2 years, 20°C / 50% humidity
End of Life / Disposal	Film: Recyclable   Liner: Recycled paper (not currently recyclable - could be used for refuse derived fuel (RDF))   Core: Recyclable   Core Holders: Recyclable   Bag: Biodegradable   Box: Recyclable
